

Product Information Sheet

Promat Roll Out Mat Connect

Since first launching our Roll Out Mats just over 2 years ago they have quickly become one of our most popular products, and it isn't hard to see why!

They are an all-purpose mat designed for use anywhere from schools to leisure centres to martial arts clubs. They are the ideal mat for places where matted flooring needs to be installed and removed regularly to make way for different events or sports.

Features:

- Manufactured using a high-density cross-link foam (40kg/m³) - using tiny air pockets to cushion impact from falls and takedowns.
- Heavy duty tatami PVC surface which increases durability and longevity.
- Lightweight and easy to carry and transport.
- Hook & Loop Connectors on either side of the mats. No need for tape for making a seamless area.
- Setup and put away in a matter of minutes - even for large areas!
- Available in Black

Sizes & Weights:

- 3m x 1.5m x 40mm - 10kg
- 6m x 1.5m x 40mm - 20kg
- 9m x 1.5m x 40mm - 30kg

Installation:

- Mats can be cut down to size before dispatch for specific room requirements.
- Mats can also be cut down with sharp Stanley knife once received.

Tolerances:

All Promat Roll Out Mats are made to strict quality guidelines and manufacturing tolerances apply. Roll lengths/widths may have slight variances as follows:

- Length +/- 1%
- Width +/- 1%
- Thickness +/- 3mm

Please note all foam products used in sports mats are susceptible to minor expansion and contraction with temperature change. Be aware of significant temperature changes in your workout area which may need you to adjust mats accordingly.

Premat Roll Out Mat Connect

Premat Roll Out Mat Connect Mats are intended for use in all types of martial arts (MMA) and general gymnastics. Please note these are sports that can cause injury. These mats will not prevent injury but are for use to minimise an injury. Before engaging in any exercise or training programme on a mat area you need to carry out an appropriate risk assessment.

Usage Tips

When installing PVC Roll Out Mats it is recommended that you frame them to ensure that no slippage will occur. Simply lay one mat out and line the next one up so that the hook and loop connectors lay flat on top of another.

PVC Roll Out Mats are designed to be laid on a flat floor surface. If the surface is not flat this may cause damage to the mats and a possible risk of injury.

PVC Roll Out Mats have a smooth finish to minimise friction burns.

PVC Roll Out Mats are designed to be used in dry conditions. Moisture on the mats could increase the risk of slippage and injury.

Cleaning

Mats should be cleaned regularly. Failure to do so could lead to lower life expectancy of the mats and create health & safety risks. Dirt and dust build-up could cause mats to deteriorate. To clean your mats we recommend that you do the following;

For PVC mats use a sponge or mop for removal of stains.

Only use warm water with a non-surfactant disinfectant cleaner.

Do not use any form of detergent or bleach.

Wipe up any spills as soon as possible.

Do not use abrasive scrubbing tools.

Handling & Storage

Mats should be stored in a suitable area to avoid damage. Leaning them on their sides can cause warping.

It is recommended two people carry larger mats to avoid damage and risk of injury.

Do not drag the mats as this will cause damage.

Do not put any gymnastic apparatus or furniture on top of the mats which may cause damage.
